**DRAFT REGULATIONS**

1. These regulations may be called the Indian Boiler (... Amendment) Regulations, 1978.

2. In the Indian Boiler Regulations, 1950, in regulation 561, for sub-clause (viii) of clause (b), the following sub-clause shall be substituted, namely:—

"(viii) Radiographic Examinations:— Every portion of the longitudinal and circumferential butt—welded seams of the shell of the boiler shall be subjected to radiographic or ultrasonic examination. Where ultrasonic examination is used, it shall be demonstrated to the satisfaction of the Inspecting Authority that the equipment and the technique used are satisfactory. The manufacturer shall ensure that the operator employed is competent to use the equipment, apply the technique and interpret the results of the examination. The methods employed in obtaining the radiographs shall be such as to show

clearly differences equal to 2% of the thickness at the welded joints. To determine whether this result is being attained, an indicator of approved form which includes a portion equivalent to not more than 2% of the Joint thickness shall be placed in the vicinity of the weld so as to make a record on each radiograph. Each section of every weld shall be marked so that the radiographs can be easily corrected to the particular part of the seam represented.

The examination shall be made from the original films and the acceptability of the welds shall be decided by the Inspecting Authority. The welds deemed unsatisfactory shall be rejected or dealt with under the condition of regulation 560 and can be radiographed again. The films shall be retained by the manufacturer for a reasonable period for reference and be available to the Inspecting Authority, if required.

*Note:* — 1) Magnetic particle flaw detection: - Magnetic methods of flaw detection shall be employed wherever possible for ferritic steel.

2) Dye-penetrant flaw detection: - Dye penetrant of equivalent methods of flaw detection shall be employed for Austenetic or other non-magnetic steel".

#### Notification

The following draft of certain regulations further to amend the Indian Boiler Regulations, 1950 which the Central Boilers Board proposes to make in exercise of the powers conferred by section 28 of the Indian Boilers Act, 1923 (5 of 1923), is hereby published, as required by sub-section (1) of section 31 of the said Act for the information of all persons likely to be affected thereby and notice is hereby given that the said draft will be taken into consideration at the end of Forty Five days from the date the Gazette containing this notification of publication is made available to the public.

2. Any objections or suggestions which may be received from any person with respect to the said draft within the period so specified will be considered by the Central Boilers Board. Such objections or suggestions should be addressed to the Secretary, Central Boilers Board, Ministry of Industry (Department of Industrial Development), Udyog Bhawan, New Delhi.

#### DRAFT REGULATIONS

1. These regulations may be called the Indian Boiler (... Amendment) Regulations, 1978.

2. In the Indian Boiler Regulations, 1950, —

(i) for regulation 268, the following shall be substituted, namely: —

"268. Hydraulic Tests at Makers Works: — Drums and similar components of the water tube boilers shall be hydraulically tested on completion of manufacture at the maker's works in the presence of Inspecting Officer to  $1\frac{1}{2}$  times the design pressure without indication of weakness or defect. Alternatively this test may be made on completion of erection at site. In case of drums and headers which are to be fitted with tubes, the test may be made before drilling tube holes but after the attachment of nozzles and similar fittings. The test pressure shall be maintained for a sufficient period to permit complete examination by the Inspecting Authority. In case of drums of 'composite' constructions, e. g., part rivetted and part welded seams or seamless forged drums shells with ends attached by fusion welding, the test pressure shall be the same as for the fusion welded drums.

Should the hydraulic test reveal any defect in the welded seam, it shall not be repaired unless agreed to by the Inspecting Authority.

On completion of agreed repairs to a drum which has previously been stress-relieved by heat treatment, further heat treatment, if required by the Inspecting Authority, shall be done and the drums shall again be subjected to the hydraulic test";

(ii) In regulation 379, for clause (2), the following shall be substituted, namely: —

"(a) Subject to the provisions of sub-regulation (e) of regulation 381, every boiler shall be hydraulically tested after erection on site in the presence of the Inspector to  $1\frac{1}{4}$  times the design pressure without indication of weakness or defect. If the process of manufacture has not permitted the hydraulic test of the component in the manufacturer's plant, the test on completion shall in any case be taken to  $1\frac{1}{2}$  times the design pressure. The hydrostatic test pressure shall be maintained for a sufficient period to permit complete examination by the Inspector".
